

**Dr. Don Johnson will be speaking at First Baptist Church Arlington on Sunday August 23rd**

1. Message on “[Prerequisites for Life on Earth](#)” during Sunday School hour at 9 AM
2. Message on “[Amazing Scientific Insights of the Bible](#)” at Evening Service at 6 PM

**Prerequisites for Life on Earth:** After a quick review of the real computers and programs in all life, this talk considers the properties of nature’s constants and natural laws that are required for life’s informational structures to be incorporated in even the simplest life. With excerpts from a new “Programming of Life – Earth” video, we’ll consider life’s amazing chemicals and their unique properties. Analysis of the probabilities of life’s required component’s properties occurring anywhere in the Universe shows infeasibility by “natural processes,” but shows compatibility with the Bible. Science is shown to be in need of answers, not unsubstantiated speculations.

**Amazing Scientific Insights of the Bible:** After a brief review of the Biblical basis for studying science and great scientists, we’ll look at “naturalistic problems” in which Bible insights are amazing, including the origin and conservation of mass and energy and life’s fantastic information complexity. We’ll look at amazing facts that science has recently revealed that the Bible spoke of in such areas as the Earth uniqueness and history, astronomy, biology, and archaeology. We’ll look at scientific evidence that compares Bible narratives to what is portrayed as “science.” We’ll also consider statistical probabilities of fulfilled specific prophecies, and ramifications of yet unfilled prophecies. We’ll also consider the possibility of scientifically verifiable verbal inspiration of scripture.

[Don Johnson](#) earned Ph.D's in both Computer & Information Sciences and in Chemistry. He was a senior research scientist and consultant for over 14 years, and taught 20 years in universities in the US and Europe. Since "retiring" as an APU (Christian university) professor, he has done consulting, speaking, and writing (4 books, including best-selling “Programming of Life,” and several peer-reviewed papers). He has made Christian and secular presentations across the US and on most continents. His [www.4iam.org](http://www.4iam.org) Christian Website has links to the “Programming of Life” [PoL video](#) (over 289,000 on-line views), several video presentations and printable flyers, as well as links to his two secular science Websites. For over 20 years he believed, taught, and defended the evolutionary scenarios, until science convinced him of the bankruptcy of those beliefs.
