Carl Kerby, Founder and President of Reasons For Hope, will be presenting two lectures addressed to the youth and families. Believers of all ages will benefit from both of these lectures:

1. [Remote Control: The Power of Hollywood on Today's Culture](#).
2. [What About ... Human Evolution?](#)

[Remote Control: The Power of Hollywood on Today's Culture](#) - Currently children spend 900 hours a year in a school. That same student typically spends 1064 hours in front of a TV. If the church thinks they can overcome this much indoctrination by having the youth for 1 -3 hours a week by playing games and eating pizza, they're wrong! In this talk Carl shares numerous examples from Comic books, TV, Movies etc. showing how much indoctrination is taking place. Even in family friendly materials there are blatant teachings that are undermining our young people's ability to trust the Word of God. This talk will help Christians to get their 'radar' turned on in order to catch these falsehoods. It will also teach parents how they can use the media as a way to start communicating the truth of God's Word.

[What About ... Human Evolution?](#)

In our world today we're inundated with the message that man evolved over millions of years. Our school systems, television programs, movies and even music push this message on us constantly. But, what does the 'evidence' really show? Using information from the "Revealing the Link" website Carl will discuss the supposed evolutionary 'ancestors' used there to "prove" human evolution. This includes the world famous, Lucy. Once we look beyond the "vener" at what the actual evidence really shows, you may be surprised! We can and need to have answers to these issues today.

Carl Kerby is a former air-traffic controller and a creation apologist speaker who teaches how to defend the Bible against scientific naturalism.
