

Genesis Apologetics Messages by Pat Roy

DEBUNKING EVOLUTION: This message covers all twelve topics presented in the **Debunking Evolution** video series. The presentation is comprised of a Powerpoint lecture and video clips from the series itself. The twelve topics covered include:

Human Evolution	Radiometric Dating
Adaptation	Uniformitarianism
Natural Selection	Whale Evolution
Common Ancestors	Homological Structures
Vestigial Structures	Extinction
Fossils	Why Creation?

CREATION WEEK: This message shows Genesis One as a love-letter, an account of the Creator preparing a home for the ones made in His image. We will focus on the scientific issues of each day of creation. We will incorporate interesting videos to bring to bring each of these days to life. It concludes with applying the creation account to our lives, as we discuss what it means to be made in the image of God.

AGE OF THE EARTH: When you add up all the chronologies of the Bible, it appears the earth is only thousands of years old. However, secular scientists tell us the earth is 4.6 billion years old. Is the Bible wrong? Why does it matter?

MOUNT SAINT HELENS: In 1980 was the eruption of an amazing volcano. That event taught us about layering, erosion, and deposition of "petrified forests". How does all of this apply to the worldwide flood?

ICE AGE: Secular scientists still don't have a clear model for explaining the Ice Ages. However, creation scientists have shown that there is great evidence that the worldwide flood would throw the earth into an Ice Age.

TOWER OF BABEL: Why are there so many different types of people? Where did all the different languages come from? Learn how the Biblical account gives an exciting explanation to both of these questions.

CREATION EVANGELISM: Knowing all the evidence in harmony with the Bible is a wonderful thing! However, using it to allow God to change lives is even more important. In this presentation the audience will learn to use the creation message as a tool to reach others for Christ!

WHY DOES IT MATTER?: So many times Christians ask the question, why does creation matter? This talk presents the horrible impact of evolution on society, and presents the biblical solution. The information is presented with enchanting stories, video clips, and quotes by some of the most significant thinkers of our time.

THE WORLDWIDE FLOOD: Imagine what must've been happening during Noah's Flood. There would've been earthquakes, tsunamis, huge storms, volcanoes, and global catastrophism. If that were true, we should see the evidence everywhere.

Speaker Pat Roy Bio: Pat Roy worked at the **Institute for Creation Research (ICR)** for over 12 years. In that time, he and his team conducted hundreds of interviews with leading creation scientists. It was his job to understand the scientific research and to present it to lay-audiences. Pat first begun speaking for **ICR** over 20 years ago. Later, Pat and his wife, Sandy, created, wrote, and produced the **Jonathan Park audio adventures**, reaching an audience of millions. Now they have created a new creation-based family audio series called **Time Chroniclers**. Pat has given hundreds of presentations and hands-on workshops. Pat now serves on the board of the **International Association for Creation** and Director of **Genesis Apologetics**. His duties include research, speaking, and producing new resources to reach teens with the scientific case against evolution, and for creation. He and his wife wrote the scripts, and directed the video production of the new **Debunking Evolution** series.
