

# Evolution's Achilles' Heels

Presented by Dr. Rob Carter

In CMI's book and documentary "*Evolution's Achilles' Heels*," 15 PhD scientists were asked to list the fatal flaws of evolution according to their own areas of expertise. Dr. Carter will summarize the major issues for the evolutionists in three critical areas: natural selection, genetics, and the origin of life.

---

Dr. Rob Carter graduated from the University of Miami as a Marine Biologist and is passionate about connecting science and Creation. He is currently serving as a senior scientist and speaker for CMI-USA.

**Friday, January 26th at 7:00pm**

**Atonement Free Lutheran Church  
6905 172nd St. NE Arlington, WA 98223**
