

Carl Kerby Talks - December 2024

1. **There Is No Truth – Debunked!** Is there really truth? Is there a standard referent? Can there be your truth and my truth? In this full length talk by Carl Kerby of Reasons for Hope, Carl dives deep into the aspect of Truth. He will teach you how to see how society continually tries to shift the definition of it. This is definitely an eye opening talk about the reality.
2. **Human Evolution is a Fact – Debunked!** We have learned that humans have evolved from our common ancestor, Homo Erectus. But, does the evidence truly support that? Watch this talk from Carl Kerby and critically think along with him as he analyzes human evolution. In their words let them explain and then explain again the theory behind the evidence.
3. **Fossil Record Proves Evolution – Debunked!** What actually does the fossil record show? Many articles make statements that they have proven the missing links, but have they? Watch as Carl Kerby debunks the many claims of proof that proclaim evidence. Carl entertains while showing you how to critically evaluate the evidence of the fossil record proving evolution.
4. **What About Fossils?** Let's talk about fossils and what the evidence actually supports. Slow, gradual processes or rapid, catastrophic processes? This entertaining talk will challenge the belief that the fossil record supports the teaching of millions of years. A proper understanding of what the 'evidence' shows in the fossil record is vital to having Biblical answers in today's world. We will cover how bias and world-views affect the way that we see the world around us. Questions such as, "What do fossils really show us?" "Doesn't it take millions of years for fossil formation?" "What about the phylogenetic charts of many animal families 'proving' evolution?" will all be discussed. You will learn how to look at these things with a critical eye. The information in this talk will help prepare you to reconnect the Bible to the real world. This talk will address the "Know it!" challenge.
5. **Noah's Flood: Fact or Fantasy?** Does the scientific evidence support the Biblical account of a global flood? See and hear real-world evidence for rapid, global deposition which absolutely supports the Word of God, and WHY CHRISTIANS SHOULD CARE about this issue!
6. **March of Progress – Debunked!** Without a doubt the most famous image ever produced that popularized human evolution is, "The March of Progress". This chart from the Time-Life Series, "Life Nature Library" was in classrooms around the world and supposedly proved beyond a shadow of doubt that man evolved from an ape-like ancestor. In this booklet Carl shows you the original chart and then uses secular sources to destroy this bogus claim. You shall know the truth and the truth shall set you free! See for yourself what the evidence actually supports.
7. **Path to Birds – Debunked!** Taking the popular image entitled "Path to Birds," which allegedly depicts the evolution of dinosaurs to birds, Carl Kerby will critically evaluate each supposed avian ancestor and look at the evidence with a logical and evidential mindset. Does *Jurassic Park* get it right? Does the evidence actually support the image? We invite you to see for yourself so that you can make an informed decision and learn what the artwork truly reveals.
8. **Homology Proves Evolution – Debunked!** One of the most used evidences to supposedly "prove" evolution is homology. In this talk Carl addresses this claim by going through a brief history of the topic as well as defining the term and showing how the definition has changed over time. Issues such as ape and human DNA being 98 per cent similar, and mosquitoes evolving resistance to insecticide will also be addressed.
9. **Genesis Doesn't Matter – Debunked!** This talk will share vitally important research on the youth that are leaving the church. We can stem the tide! This talk is vital to understanding why the book of Genesis is so important to the issues we are dealing with in the world today. In a culture where we are losing so many

young people who are raised in the church we need to figure out what the causes are. If you don't know "when" and "why" we are losing them, we can never figure out a "how" to solve the problem. Using research done on 20 years old's who were raised in the conservative church and who have walked away Carl will show "when" and "why" and then propose a "how" to overcome this serious problem. This talk will address the "Know it!" challenge.

10. **What About Genesis? Can We Trust It?** This talk will share vitally important research on the youth that are leaving the church. We can stem the tide! This talk is vital to understanding why the book of Genesis is so important to the issues we are dealing with in the world today. In a culture where we are losing so many young people who are raised in the church we need to figure out what the causes are. If you don't know "when" and "why" we are losing them, we can never figure out a "how" to solve the problem. Using research done on 20 years old's who were raised in the conservative church and who have walked away Carl will show "when" and "why" and then propose a "how" to overcome this serious problem. This talk will address the "Know it!" challenge.
11. **The Bottom Strip of the Christian Faith.** Another oldy but goody. This is one of the talks Carl has done that many people remember the most. Carl goes through his days as an air traffic controller at the Chicago O'Hare airport and how Christianity played a big part of handling the stress of that.
12. **What Is The 'Best' Evidence God Created?** Audiences across the globe have been thrilled with this colorful, eye-catching presentation on some of the most astounding evidences of God's handiwork. The talk builds to an unforgettable conclusion! Do you know what the 'Best Evidence' is that God created?
13. **Real World Evangelism – The Smithsonian!** Can't make it to Washington D.C. to tour the Smithsonian? Let's do a virtual tour, from a biblical perspective. Using only secular sources Carl will discuss the supposed evolutionary ancestors that are depicted in the Smithsonian's 24.5 million dollar exhibit showing human evolution. This is a great talk to do with people just before they go on a trip to Washington D.C. and visit the world famous museum. You may be surprised at what is actually found, and what is depicted. You may also be surprised to find out that the supposed "evidence" that is used supposedly showing human evolution as a fact, isn't what the actual evidence supports. This is a VERY important talk and ones that will hopefully show parents how to teach their children to apply their faith in the "real world"!
14. **Weapons of Mass Instruction – Unearthing the Truth!** Join Carl Kerby, on a journey of a lifetime. In this fun, fast paced video Carl will take you to the dinosaur fields of Glendive, Montana where you will see for yourself what the evidence actually supports. Slow, gradual processes or rapid, catastrophic processes. Walk through the Glendive Dinosaur and Fossil Museum and see life size replica's of these amazing creatures. In addition, you will learn how what we read in the Bible actually supports what we see in the world around us. Joining Carl are men with years of experience in paleontology and chemistry. They will share their expertise to help you make an informed decision. Our desire is for this video to help "Teach you how to turn the world into your classroom!"
15. ***3 Tools Satan Uses to Deceive*** In John 8:44, Jesus describes Satan in His rebuke to the Pharisees: "He was a murderer from the beginning, and does not stand in the truth, because there is no truth in him. When he lies, he speaks out of his own character, for he is a liar and the father of lies." In this talk, Carl Kerby addresses three of Satan's deceptive tools to get us to question God's Word and will for our lives, namely doubt, blatant lies or misquotes, and misinterpretation of Scripture. After addressing each and identifying them practically,

Carl will challenge and encourage you with ways to overcome these tactics and claim victory in Christ.

16. ***What about...AI?*** We invite you to engage with us in a thought-provoking discussion that explores the intersection of Artificial Intelligence (AI) and Christian beliefs, examining both AI's potential blessings and ethical challenges. Carl Kerby begins by recognizing God as the ultimate Creator of all things, including the human capacity for innovation. He will guide us in discovering how AI, a product of human ingenuity, can be a tool to honor God's creation by alleviating suffering, promoting justice, and advancing medical research. Ethical dilemmas that AI poses from a Christian standpoint—the potential to perpetuate bias, challenge traditional notions of free will, or infringe on human dignity—will be thoroughly examined. How do we navigate these challenges while staying true to our Christian values? Designed to encourage open dialogue and reflection among participants, this session will help believers discern how AI can be harnessed for the greater good while remaining grounded in Christian ethics. Join us for a compelling discussion that seeks to harmonize faith and technology in our rapidly evolving world.

Here are the list of 26 talks that Carl has on the RFORH website now:

1. Something from nothing
2. Whose “Voice” are we listening to?
3. What about aliens?
4. Finding God in Ancient China
5. 1 Peter 3:15 & Giving Reasons For Hope!
6. Answering Skeptics – Bill Nye!
7. Answering Skeptics – Richard Dawkins
8. Becoming Bold! Know it! Live it! Share it!
9. Dads - it's time
10. Does “What's in the Bible?”, Teach What's In The Bible
11. Evangelism 101
12. Full Code or Comfort Measures! What Faith Do You Have?
13. Is “The Bible” Biblical?
14. Jesus on Genesis!
15. Jurassic Park or Jesus: Who Knows More?
16. Real world evangelism – air traffic control!
17. Real world evangelism –the Grand canyon!
18. Real world evangelism – the Smithsonian!
19. Remote Control: critically evaluating what we watch!
20. Remote Controller: Critically evaluating what we are playing!
21. What about ... Dinosaurs?
22. What about ... fossils?
23. What about ... Genesis? Can we trust it?
24. What about ... Human evolution?
25. What about ... races?
26. What is the ‘best’ evidence God created?
